

POLLUTION GUARDIAN

CLOUD SYSTEM TO MANAGE THE ANALYSERS

Pollution Guardian is the Cloud Solution to access remotely to the analytical data acquired from the analyser.

Guardian allows to:

- Archive and display the data remotely in real-time
- View the historical data
- Control and manage the instrument remotely
- Set user-defined alarms and send notifications via SMS, email or push notifications thanks to the APP (iOS and Android)

Pollution Guardian allows remote access for remote assistance by qualified technician
